

## PF400 POWER FAN AND VENTILATOR

PF400 with **OCTI-DRY™**

The most versatile air movement system available, the Ebac PF400 can be used as a stand alone fan for high capacity drying, or in conjunction with a duct to inject fresh air or extract contaminated air. By joining a series of ducts and fans together, the PF400 can be used to extract or replenish air over considerable distances. It also works great with the new, patented **OCTI-DRY™**, the most revolutionary way to dry behind walls and beneath hardwood floors.

### Features:

- 1) Lightweight and portable
- 2) High Performance - up to 3000 cfm free air  
1 1/2" static pressure
- 3) Robust, welded steel construction
- 4) Carrying handle
- 5) Options include 8" or 12" flexible duct; duct storage case
- 6) Use with **OCTI-DRY™** to dry behind walls and beneath hardwood floors - dry over 100 feet of wall with one PF400!

### Specifications:

Model: PF400  
16 1/4" (H) X 12" (W) X 17 1/4" (L)  
Weight: 42 lbs.  
Power: 115V, 50/60 Hz  
Amps: 9

Caution: Not designed for operation in explosive or flammable atmospheres.
