- Requires Minimal Maintenance
- Is Out of Sight
- Runs Quietly

 **General Filters**  
Inc.

## Winter months mean drier indoor air.

When the air in your home is too dry, you know how unpleasant it can be.

### Health concerns

The right humidity levels keep your sinuses and throat healthy, reducing the incidents of cold, flu, respiratory infections, allergies, asthma, and bloody noses. Studies show that humidity that's too low contributes to the flu virus surviving longer, while simultaneously increasing its ability to spread from one person to another.

### Dry, itchy, cracked skin

Dry air causes your skin to dry as well, and left untreated can cause anything from minor discomfort to cracked,

### Temperature discomfort

Dry air causes air to feel cooler than it really is, leading you to turn up the thermostat. The result is even drier air and a higher heating bill. Adding

### Damage to your home and assets

Dry air pulls moisture from your home's wood framing, trim, flooring, and furniture. Expensive artwork and musical instruments can become damaged. Dry air causes gaps between ceilings and walls, letting in cold winter air and increasing the cost of your heating bill.

### Static shock

When the air is too dry, static electricity begins to build up. This can cause blankets and clothes to stick together and, more importantly, cause painful electric shocks when you touch a doorknob or another metal surface. Static shocks can damage expensive electronics.

- Air that's too dry

- Easy & Quick Vapor Pad® Replacement Through:
  - Snap-in-Place, Easy-Lift-Off Cover
  - Sturdy “Pull Apart” Two-Piece Vapor Pad® Frame
- UV Stable Cover
- MHX3C Manual Humidistat - Included With M Models Only
- GFX5 Automatic Digital Humidistat - Included With A Models Only
  - Controls the Furnace Blower Motor
- Model 3200 Is Suitable for Homes Up to 3200 Square Feet
- Model 4200 Is Suitable for Homes Up to 4200 Square Feet

## The Comprehensive Approach to Indoor Air Quality

Creating a healthy indoor air environment requires a comprehensive approach; one that eliminates harmful pollutants and sources of discomfort in your home. Humidity control, air purification, and particulate removal are equally important components of that plan.

Installing MAC Air Cleaner with a MERV 11 filter will remove airborne dust, dust mites, pollen, pet dander, and other airborne pollutants as small as 1.0 microns (a human hair is 75 microns). Reduce allergy and asthma triggers with a MAC air cleaner.

Contact a local General Certified Contractor to learn more about how to create a healthier and more comfortable home for you and your family.
