NOTE: All wall sleeves used to mount the new Air Conditioner must be in sound structural condition and have a rear grille that securely attaches to sleeve, or rear flange that serves as a stop for the Air Conditioner.

CAUTION: When installation is complete, replacement unit **MUST** have a rearward slope as shown.

2. Remove old Air Conditioner from wall sleeve and prepare wall sleeve as follows:

- Clean interior (do not disturb seals).
- Wall sleeve must be securely fastened in wall before installing Air Conditioner.
Drive more nails or screws through sleeve, into wall, if needed.
- Repair paint if needed.

3. If not existing, drill a 1/8" clearance hole for grounding screw through left side of wall sleeve, in a clear area about 3 inches maximum back from front edge of sleeve, using grounding screw and toothed washer. Pull loose end of ground wire out front of sleeve, and temporarily bend it down and around lower edge of sleeve. This ground wire will later be attached to frame of air conditioner once it is installed.

INSTALLATION INSTRUCTIONS

Direct Unit Mounting:

The previous directions are the preferable way to mount the new rear grill. The unit's performance is slightly better and the possibility of draughts is reduced. As a last resort, direct mounting of the grille to the unit can be considered.

Note: The grille must be installed prior to inserting the unit into the sleeve.

1. Attach the 2 seal pieces (1"X3/8"X14") as shown in Fig. 1.

2. Position the grille over the rear of the unit making sure that:

a. The double set of screw holes are at the bottom.

b. The fins of the grill are pointed away from the unit.

3. Align the top of the grille with the top of the unit. The overhang on each side is equal.

4. If the unit has not been pre-drilled (some models), carefully drill 4-1/8" holes through the grille and into the side flange of the unit approximately 1 1/2" to 2" from the top and bottom as in Fig. 2, 3.

(Be careful not to drill into the copper heat exchanger coils.)

5. Install 4 - #8 self tapping screws to affix the grille to the unit.

6. Insert the unit into the sleeve.

INSTALLATION INSTRUCTIONS

FINISHING INSTALLATION:

2. Assemble the trim frame by inserting top and bottom pieces into side pieces and snapping into place.

3. Pull cord through trim frame then slide over unit until flush with wall.
