

INSTALLATION

It is important that the installation instructions below are followed for successful installation of this Portable Air Conditioner. Please call Customer Support if you have any difficulties or queries regarding these installation procedures.

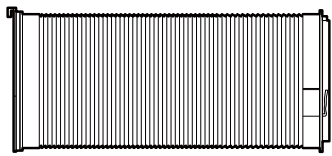

Installation Kit:

- | | | | |
|---------------------------------|-----------|-----------------|-----------|
| 1. Window Bracket Kit | (1 Set) | 4. Hole Cover | (1 Piece) |
| 2. Window Bracket Panel Adapter | (1 Piece) | 5. Exhaust Hose | (1 Piece) |
| 3. Exhaust Hose Connector | (1 Piece) | | |

Installation Steps:

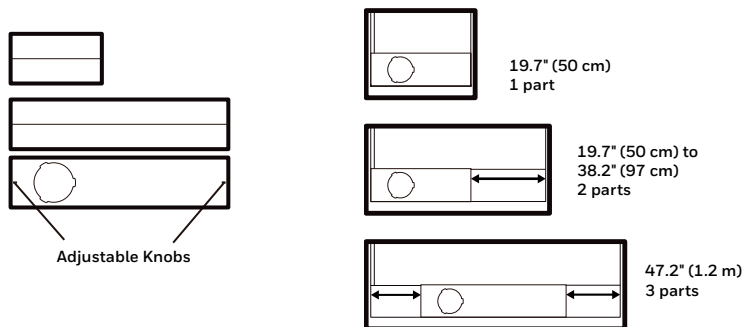

1. Exhaust Hose Connector, Exhaust Hose and window bracket panel adapter are pre-assembled inside the package.

Hose:
Length: 12" to 47" (30 cm to 120 cm)

INSTALLATION (CONTINUED)

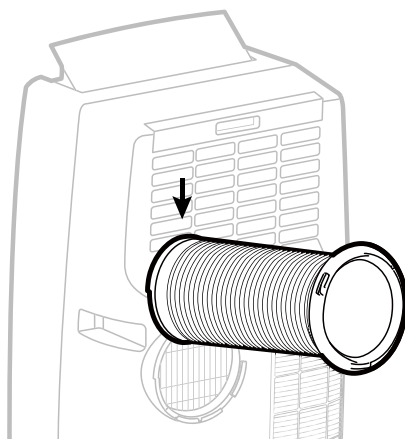

2. The Window Brackets are approximately 19.7" (50 cm) each, allowing you to install to windows and balcony doors of different heights or width.

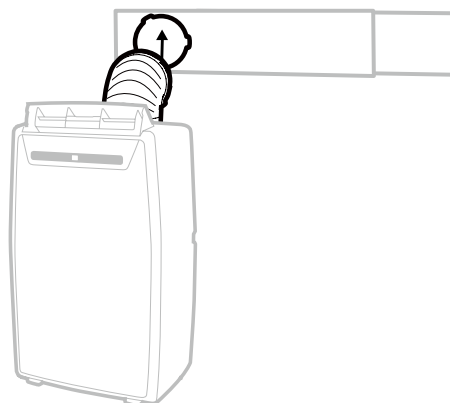

To install the window bracket to the window frame, you need to adjust the height or width of the window bracket by extending the length according to the height or width of the window. When the length is set, tighten the Adjustable Knobs (preinstalled on the window bracket) to ensure the window bracket is secured in the desired position. Use one or all three pieces of window bracket as needed.

Note: After setting the window bracket to the size of your window, please remove it from the window and follow the instructions below.

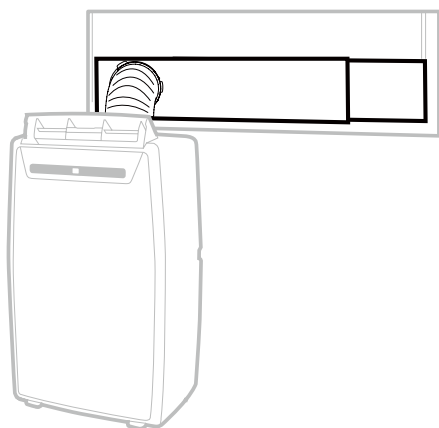

3. Connect the Exhaust Hose to the rear exhaust outlet on the back of the unit. Slide-in the Hose Connector from up to down.

4. Connect the window bracket to the window bracket panel adapter. Slide-in the window bracket panel adapter then rotate clockwise until it is locked in place.

5. Connect the window bracket to the window.

6. The Portable Air Conditioner is now ready to use.
