Getting started

Power modes
Your machine has three power modes for different tasks. Change power modes quickly using a single button.

The screen showing the machine set to Eco mode with a full battery in green to show that this will give the longest battery life of the three modes.

Eco mode
Maximum run time for longer cleans all around your home.

Two screens showing the machine set to Auto mode and Med mode with a blue battery showing that this will give a medium length of battery life.

Auto and Med mode
The optimum balance of power and run time. Attach your Digital Motorbar™ XL cleaner head to activate Auto mode. Dyson DLS™ technology automatically changes motor speed between floor types.

The screen showing the machine set to Boost mode with a red battery to show that this will give the shortest battery life of the three modes.

Boost mode
Designed for intensive spot cleaning of ground-in dirt.

Run time countdown

When the battery needs charging, your machine will pulse three times and a low run time icon will appear on the screen.

When your battery is empty, a red warning icon will appear on the screen.

When Particle count and graph is turned on, low run time will be in amber and red when in Boost mode.

The screen with a battery time remaining shown as a number and as a half filled battery.

A red screen with an icon with a plug being connected to the power supply. This demonstrates the battery is empty and needs charging.

Battery health

To get the best performance and life from your battery, use Eco or Auto/Med mode.

The battery health is shown on the batteries on the screen.

Exit settings menu

To exit the settings menu, tap to scroll through the selection menu. Select 'Exit menu'.

Screen with Exit menu wording and return icon.

Alerts

The alerts you might see are:

Filter – the filter isn't fitted correctly, or needs cleaning.

Blockage – your machine has a blockage that needs removing.

Alert icon with Fully charge before first use wording.

Alert icon with Airways blocked wording.

Alert icon with Filter not sealed wording.

Alert icon with Filter needs cleaning wording.

Cleaning your bin

Remove your bin

If it is necessary to clean your bin, empty it as shown in the 'Emptying your bin' section.

Press the red button located on the bin runner to release the bin and slide your bin off the runner.

Only use a damp, lint-free cloth to clean your bin.

Make sure that your bin and seals are completely dry before replacing.

Refit your bin

Insert the spine on to the bin runner.

Close your bin by pushing the bin base upwards until the bin and bin base click into place.

Your bin isn't dishwasher safe and the use of detergents, polishes or air fresheners to clean your bin isn't recommended, as it may damage your machine.

Clearing blockages

Disconnect your machine from the charger before looking for blockages. Be careful not to touch the power button and be aware of sharp objects.

Leave your machine to cool down before looking for blockages.

Don't use your machine when looking for blockages as this could cause injury.

If your machine detects a blockage, the motor will pulse six times. You won't be able to use your machine until the blockage has been cleared.

If you try to use your machine when the motor is pulsing, it will automatically cut out.

Leave your machine to cool down before looking for blockages and, for your safety, take care not to touch the trigger.

Clearing obstructions from your Motorbar™ cleaner head

Your Motorbar™ cleaner head doesn't have a washable brush bar. To maintain optimum performance, check your brush bar regularly and clear any obstructions.

Make sure your machine is disconnected from the charger and take care not to touch the trigger.

Remove your brush bar

Don't put any part of your machine in a dishwasher or use detergents, polishes or air fresheners.

Press the cleaner head release button on the end of the wand. Place the cleaner head upside down.

Lift the catch on the cleaner head to release the brush bar.

Slide your brush bar out of the cleaner head.

Look for obstructions

Clear any debris from your brush bar.

Check inside the cleaner head and remove any debris or blockages.

Your Motorbar™ cleaner head and brush bar aren't washable. Wipe over with a damp lint-free cloth.

Replace your brush bar

Push the brush bar back into the cleaner head.

Push down the brush bar release catch until it locks in position.

The brush bar release is located on the back of the cleaner head on the left hand side. The brush bar pulls out of the opposite end of the cleaner head.

Clearing blockages from your Hair screw tool

Your Hair screw tool doesn't have a washable brush bar. To maintain optimum performance, check your brush bar regularly and clear any obstructions.

Make sure your machine is disconnected from the charger and take care not to touch the trigger.

Remove the cover and brush bar

Remove the Hair screw tool from the wand or machine.

Push the base plate open. Press the red lever down to release the cleaner head cover.

Pull the cleaner head cover off the main body of the tool.

Look for obstructions

Put your brush bar firmly to remove it from the main body.

Check and remove any obstructions from all three parts of your Hair screw tool.

Your Hair screw tool isn't washable. Wipe over with a damp lint-free cloth.

Don't put any part of your machine in a dishwasher or use detergents, polishes or air fresheners.

Re-assemble Hair screw tool

Put your brush bar back into position and press firmly until it clicks back into position.

Check the red locking lever is in the unlocked position. Align the cleaner head cover with the guide on the main body. Push it down until it clicks into position.

Push the red locking lever up until it clicks into position and push the base plate back into place.
