

LMA-G

Group Control Adapter

LMA-G is specially designed to be used with ThinkGrow single-bar fixtures, i.e. Model-I and I Plus. The LMA-G needs to be connected with a lighting control adaptor to offer a group control function to the grow lights. Each LMA-G can control one group of lights./ Each light group requires one LMA-G. It needs to be connected inline with the LMA-T lighting control adapter to activate the group control function. Up to 10 groups of lights can be created, each with individual settings.

Specifications

LMA-G

Input

Voltage	12V
---------	-----

Current

Maximum Current	0.1A
-----------------	------

Working Environment

Temperature	32°-122°F
-------------	-----------

Humidity	≤90%
