Hub

For consumers

DOWNLOADS

The Airthings Hub is the heart of the Airthings Ecosystem. It brings all supported devices* online, providing on-demand access to your indoor air quality (IAQ) data at any time, from anywhere! The Hub connects to devices using Airthings SmartLink, streaming data regularly to your smartphone or online dashboard. With visibility into your radon and IAQ levels, you can take action to improve air quality, sleep, good health and comfort. Easy to use and set up on your smartphone. *Airthings Hub supports Wave 2nd Gen, Wave Plus, Wave Mini and any devices with Airthings SmartLink.

INCREASE COMFORT AND HEALTH

Continuous monitoring of your indoor air quality levels is necessary to minimize potential indoor air hazards in all spaces. The Airthings Hub gives you remote access to up-to-date sensor values, no matter where you are.
FULL IAQ COVERAGE

A single Hub can cover most private homes. Airthings SmartLink offers a long-range and robust connection, which allows devices to be distributed around a large building or home. The Airthings Hub can be placed on a flat surface or mounted by fixing it with screws to the wall.

EASY TO SET UP

Easy set up of your Hub and Airthings devices using Airthings Wave App. To setup, simply connect to power and ethernet and follow instructions in the app. Receive data through the Airthings Wave App or online dashboard.

INTEGRATIONS

Hub makes your Airthings data available wherever you are, which means that using smart home integrations like Amazon Alexa, Google Home and IFTTT is even better. Get alerts and information about your air quality, even when you aren't home.

HUB PRODUCT FEATURES

Remote access to Airthings devices :
   Wave 2nd gen (device serial number 2950xxxxxx)
   Wave Plus (device serial number 2930xxxxxx)
   Wave Mini (device serial number 2920xxxxxx)
One Hub can connect to up to 30 Airthings devices
Long-range wireless connection with Airthings SmartLink
Live data streaming to the cloud
Free mobile app for iOS and Android
Mounting options: Freestanding or mounted
LED status indicators: Power, cloud and SmartLink connection
