

TriOx-20

COMMERCIAL OZONE GENERATOR

The Most Powerful Odor Elimination Machine on the Market

NEW!

TriOx-20: TOTAL ATMOSPHERIC RESTORATION

Your reputation requires guaranteed results for total air and duct sanitization. Stop wasting time with low-output units.

The TriOx-20 features dual ozone generators with a flexible 10,000 or 20,000 MGH output. This power hits the critical saturation threshold, ensuring faster treatment and thorough penetration in any space. A red blinking safety light warns that the unit is active.

A high-volume 250 CFM fan actively forces ozone deep into the treated area. For next-generation defense, a unique UVC light adds cutting-edge germicidal purification—a premium advantage your competitors lack.

The rugged, ozone-resistant, poly-molded cross-linked cabinet is nearly indestructible, backed by a limited lifetime warranty.

SKU: FG0289

THE TriOx-20 DELIVERS: POWER, PENETRATION, AND PROFITS.

Two Ozone Generators

Features a choice of a 10,000 or 20,000 MGH (Milligrams per Hour) ozone output, hitting the critical threshold for ozone saturation.

High Volume Output

Includes a disposable filter and high-volume 250 CFM fan for superior circulation, forcing ozone throughout the entire area.

UVC Protection

Features a unique UVC light that provides an added layer of cutting-edge, germicidal air purification—a premium feature your competitors can't offer.

Door Hangers

The TriOx-20 emits Ozone, which in high quantities is hazardous. We have included 2 Door Hanger warning signs to keep the work area safe.
