# Clean Force

**Part # AF-O1T-E1A50231**

## Fully washed down!!!

Finally, there is an air mover that can be used in a contaminated area, and then be fully washed down and decontaminated without the fear of damaging the equipment or voiding the warranty. The Clean Force is the first air mover designed for full washdown and decontamination. The fear of cross-contamination from your air movers is gone, and the need for a "special" air mover inventory for containments is over. The Clean Force is ideal for all situations where aggressive cleaning of the equipment will be desired. Mold remediation, Gray and Black water category water damage restoration, fire restoration or simply dirty and grimy locations where cleaning the equipment after the job is necessary. The motor assembly is a special washdown model that will resist water entry from pressure washing and drain internal condensation. The IP68 conduit and connections, designed for submersible applications, protect the wiring to the motor. These components are combined with an IP68 power switch that is dust-tight and water-proof.

## Specifications

- 110/120V • Frequency 60 HZ • Motor ¼ HP • Current 2.5 AMPS
- RPM 1625 • Height 22" • Width 21" • Length 15 ½" • Weight 38 lbs
