Tempest

Item # CF-01T-A1A20299

The Tempest's electrical system features a heavy-duty, impact-resistant housing that is virtually indestructible, and it is also fitted with a low-profile switch to minimize potential transport and operation damage. In addition to built-in thermal overload, this air mover has an advanced motor mount system held securely with heavy-duty bolts.

Operates in three positions to allow you to dry walls, floors, ceilings, and furniture with ease.

- **A powerful 0.4 HP motor (3.0 amps, 115 V/60 Hz)**
- **2 speeds for variable operation.**
- **Stackable design for compact storage and easy job-to-job transport.**
- **Rugged, durable polyethylene housing absorbs shocks and reduces corrosion.**
