EWVFS32 - Vent Free Gas Stove

Classic cast iron styling with a painted Matte black finish makes this beautiful gas stove the perfect heating appliance for any living space. The Everwarm EWVFS32 gas stove delivers 32,000 BTUs of heat in a safe and efficient way. Because it does not require a vent, it is 99% efficient ensuring you get your money's worth every time you use this stove. A log set is included with this stove to give you a realistic fire look. In addition, this stove does not need electricity to operate, meaning it is the perfect stove to own if the power is out. Standard operation is simple, just turn the switch on, select your heat output and enjoy the warmth. This stove is simple to use and can be hooked up to any standard millivolt thermostat allowing it to cycle on and off as needed. The EWVFS32 stoves can heat up to 1,500 Sq. Ft. and is available in natural gas or liquid propane (LP) models.
