Spec Sheet

Models 3200 & 4200 Features

- Model 3200 is suitable for homes up to 3200 square feet. Model 4200 is suitable for homes up to 4200 square feet.
- Newly designed, low profile cover ensures heated air goes directly through the Vapor Pad® at its warmest point.
- Newly designed distributor trough ensures even water saturation over the entire Vapor Pad® for maximum humidity output.
- Redesigned Vapor Pad® frame profile is thinner; exposing more of the saturated Vapor Pad® for maximum humidity output.
- Easy snap-in-place UV stable cover allows for quick access to Vapor Pad®.
- Stainless steel distributor tube allows for either cold or hot water supply.
- Left or right bypass installation options.
- Left or right solenoid valve installation options.
- MHX3 manual control (M Models) or GFX5 digital automatic humidistat (A Models) is included.

Installation

Vertical plenum surface of any forced air furnace

Installs Quickly & Easily

Maintenance

Replace the Vapor Pad® at least once per year.
