

Nilfisk VHS010-VHS011 ACD: Mini industrial vacuum cleaners for combustible dust and hazardous dust

The VHS010 and VHS011 ACD are a range of third-party ACD-certified vacuum cleaners, suitable for the collection of combustible dust and hazardous dust.

The uniqueness of the mini IVS range is the high mobility in narrow spaces, its compactness, and lightweight as its robustness and reliability. MINI IVS ACD models for hazardous dust, the VHS010, are also available with different types of safe disposal systems to perfectly grant always highest safety standard. The three different models, equipped with safe disposal systems, are LC, MC and HC third-party certified. The HC model uses a high-performing safe bag system, and for this reason, versions equipped with safe disposal are perfect for a wider range of applications with the most hazardous powders.

Models ACD with Pull&Clean, the VHS011, instead, can handle heavy loads of material with great stability of performance and without consumables. In ordinary usage, the Pull&Clean system is capable of incredibly extending the last of the conical cartridge filter. These models VHS011, are perfect for cleaning jobs in the food industry, where most of the powders are combustible, designed to be used for cleaning food processing machines, e.g. vertical packaging machines, conveyors belts, V-blenders, etc.. and for general cleaning of floors, desks, equipment, etc.

The three suggested accessory kits cover the most common applications. The full catalog of accessories diameter of 40 mm is compatible with the mini IVS range.

Picture shown may not represent model quoted

- Lightweight and compact
- Highly movable due to the 4 ball bearing pivoting wheels
- Reliable with 900 W and a very good suction power
- Fully equipped with convenient handle, power cord holder, and accessories holder
- Fully grounded and bounded, doesn't need inconvenient earthing wire and clamp
- Pull&Clean system grants high performance of filtration without usage of consumables
- 3 levels of safe disposal for the safest level of dust collection according to powder's classification, LCLASS and HCLASS
- Third-party certified ACD and LMH
