

AirMAX BLE Low-Profile Air Mover

BLUETOOTH-ENABLED AIR MOVER

The **Phoenix AirMAX BLE** is an air mover already equipped with a DryTAG Bluetooth beacon. It not only gives you the performance, portability and best-in-class stacking features of our industry-leading AirMAX, it will automatically pre-load all identifying information for the unit needed, including the serial number, into your DryLINK® App.

information

AirMAX BLE Bluetooth-Enabled Low-Profile Air Mover

BENEFITS of Factory Install

- Absolutely no additional equipment set up
- The installed DryTAG automatically associates with the BLE unit
- The equipment information below will automatically load in DryLINK®:
 - Serial number of the unit
 - Type of equipment
 - Image of the equipment
 - Manufacturer
 - Model
 - UUID Number

BENEFITS of DryTAG

- Appears in the app, even when not in use, for easy job setup
- Includes a sensor to show nearby equipment first to save time during job setup
- Automatically provides days of use and serial numbers to drying report
- Provides an hour meter for cumulative run time on the job
- Identifies last known location on a map (no monthly fee)

JOB STATUS and EQUIPMENT ALERTS

- Logs when equipment is turned off
- Battery life indicator with notifications

Additional BENEFITS with DryPHONE (optional)

- Delivers alerts when equipment is turned off in real-time
- Provides usage data remotely
