Upholstery Tool	35306M-06
Floor Tool	35306M-05
Wand (2 pcs)	3530PU-04
Nylong Accessory Bag	3530BJ-24

The Tornado® Marathon 350 compact unit is perfect for cleaning auto interiors and for spot cleaning office areas and retail sales floors. The unit can even handle your spray extraction needs for small carpeted areas. The Marathon 350 sprays solution deep down into carpet, dissolves dirt, and recovers the dirty solution with ease and efficiency.

With a compact design and quiet operation, the units are favorites with health care and educational facilities as well as commercial buildings, restaurants and retail stores. The user simply sprays solution through the jet-sprayed pump and recovers the dirty solution through the included clear-view tool.

The Marathon 350's solution tank has a filter for pump protection. The recovery tank doubles as a removable bucket that is easy to carry and dump when full. The Marathon 350 includes a spray suction hose, floor tool, and utility hand tool. Accessories are storable in the separate accessories holder, and two large transport wheels and two front castors allow the unit to smoothly follow the operator's movements during use.

VERSATILE

The Marathon 350 is perfect for hotel rooms, offices, auto interiors and a variety of other applications.

CONVENIENT

A separate accessories holder and the unit's mobility are among several features that make for ease of operation.

EASE OF USE

Solution and recovery tanks are removable for easy transport and disposal.
