POS127EL PWS127EL
POS187EL PWS187EL
POS247EL PWS247EL

Read This Manual

Keep this manual where the operator can easily find them. Inside you will find many helpful hints on how to use and maintain your air conditioner properly. Just a little preventative care on your part can save you a great deal of time and money over the life of your air conditioner. You'll find many answers to common problems in the chart of troubleshooting tips. If you review the chart of Troubleshooting Tips first, you may not need to call for service.

The design and specifications are subject to change without prior notice for product improvement. Consult with the sales agency or manufacturer for details.
DISPOSAL:
Do not dispose of this product as unsorted municipal waste. Collection of such waste separately for special treatment is necessary.

It is prohibited to dispose of this appliance in domestic household waste. For disposal, there are several possibilities:

A) The municipality has established collection systems, where electronic waste can be disposed of at least free of charge to the user.
B) When buying a new product, the retailer will take back the old product at least free of charge.
C) The manufacturer will take back the old appliance for disposal at least free of charge to the user.
D) As old products contain valuable resources, they can be sold to scrap metal dealers.

Wild disposal of waste in forests and landscapes endangers your health when hazardous substances leak into the ground-water and find their way into the food chain.

When using this air conditioner in the European countries, please read the following information:

- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities, or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.

DISPOSAL: Do not dispose of this product as unsorted municipal waste. Collection of such waste separately for special treatment is necessary.

It is prohibited to dispose of this appliance in domestic household waste. For disposal, there are several possibilities:

A) The municipality has established collection systems, where electronic waste can be disposed of at least free of charge to the user.
B) When buying a new product, the retailer will take back the old product at least free of charge.
C) The manufacturer will take back the old appliance for disposal at least free of charge to the user.
D) As old products contain valuable resources, they can be sold to scrap metal dealers.

Wild disposal of waste in forests and landscapes endangers your health when hazardous substances leak into the ground-water and find their way into the food chain.
SAFETY PRECAUTIONS

To prevent injury to the user or other people and property damage, the following instructions must be followed. Incorrect operation due to ignoring of instructions may cause harm or damage. The seriousness is classified by the following indications.

WARNING
This symbol indicates the possibility of death or serious injury.

CAUTION
This symbol indicates the possibility of injury or damage to property.

Means of symbols used in this manual are as shown below.

Do not extend the cable and never use multiple plugs. A poor electrical connection, poor insulation or voltage which is higher than permitted can cause fire.

Do not expose your body directly to the cool air for prolonged period.

Never poke fingers, sticks or other objects in the air inlet and outlet vents.

Never attempt to repair, relocate, modify the air conditioner yourself. Always contact your service partner if it requires.

Never pull the plug out by pulling on the cable. Hold the plug firmly and pull it out of the plug socket, otherwise there is a risk of damaging the cable.

Do not operate your air conditioner in a wet room such as a bathroom or laundry room.

Do not expose plants or animals directly to the air flow.

Never clean the air conditioner with water. Never use combustible cleaning agents as these could cause a fire or deformation.

Never place any burning objects close to the device if they could be directly affected by the emitted air.

Never step onto the outdoor device and never place anything on it.

Never use combustible cleaning agents as these could cause a fire or deformation.

Never place the unit in places where combustible gas can be emitted. Emitted gas may collect and cause an explosion.

Never allow the air conditioner to run for too long with the doors or windows open, or if the humidity is very high.

Always switch off the air conditioner and pull out the power plug during a storm. Electrical parts may get damaged.

Check that the drainage line is correctly connected. If not, water will escape.

Never use an unsteady or rusty base.

Never install the air conditioner in places where combustible gas can be emitted. Emitted gas may collect and cause an explosion.

Never actuate any switches with a wet hand. It may cause an electric shock.

Never use the device for any other purpose than the intended use. Never place food, precision instruments, plants, animals, paint, etc. on the unit.

Do not expose plants or animals directly to the air flow.

Never clean the air conditioner with water. Never use combustible cleaning agents as these could cause a fire or deformation.

Never place any burning objects close to the device if they could be directly affected by the emitted air.

Never step onto the outdoor device and never place anything on it.

Never use an unsteady or rusty base.

Never install the air conditioner in places where combustible gas can be emitted. Emitted gas may collect and cause an explosion.

Never allow the air conditioner to run for too long with the doors or windows open, or if the humidity is very high.

Always switch off the air conditioner and pull out the power plug before you start to clean it.

Use specified power cord.

Contact the authorized installer for installation of this unit.

Contact an authorized service technician for repair or maintenance of this unit.

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

Children should be supervised to ensure that they do not play with the air conditioner.

If the air conditioner is to be used in conjunction with other heaters, the air should be refreshed periodically, otherwise there is a risk of lack of oxygen.

Always pull out the power plug if the unit is not going to be used for any lengthy period of time. Collections of dust can cause fire.

If the power cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
OPERATING INSTRUCTIONS

Special functions

Refrigerant Leakage Detection
With this new technology, the display area will appear "EC" when the outdoor unit detects refrigerant leakage.

Louver Angle Memory Function (optional):
Within the scope of safety angle, it will memorize the open angle of horizontal louver. If it exceeds, it will memorize the boundary of safety angle. In the following circumstances, it will return to standard angle: 1) pressing the manual switch, 2) unplug and then plug in the machine. So we strongly suggest that the open angle of the horizontal louver should not be set too small, in case the condensed water forms and drops from the horizontal louver.

SELF CLEAN function (Optional)
- Function used after the Shut Down of cooling operation to clean the Evaporator and keep it fresh for the next operation.
- The unit will operate as following sequence: FAN ONLY mode at Low fan speed – Heating operation with LOW fan speed (applicable to cooling & heating models only) – FAN ONLY operation – Stop Operation – Turn off.

Note:
- This function is only available under COOL (AUTO COOL, FORCED COOL) and DRY mode.
- Before selecting the function, it is recommended to run the air conditioner under Cooling operation for about half an hour. Once the Self Clean function is activated, all TIMER setting will be cancelled.
- During Self Clean operation, when press the SELF CLEAN button on the remote controller again will stop the operation and turn off the unit automatically.

CLEAN AIR function (Optional)
Improving the quality of indoor air is one of the purposes of an air conditioner. This air conditioner is equipped with ionizer. With the anions generated by Ionizer, the air circulation of the air conditioner fills the room with refreshing, natural and healthy air.

8°C(46°F) Heating (Optional)
In heating operation, the preset temperature of the air conditioner can be as low as 8°C(46°F), which keeps the room temperature steady at 8°C(46°F) in winter.

Follow Me function (Optional)
The remote control serves as a remote thermostat allowing for the precise temperature control at its location.
To activate the Follow Me feature, point the remote control towards the unit and press the Follow Me button. The remote display is actual temperature at its location. The remote control will send this signal to the air conditioner every 3 minutes interval until press the Follow Me button again. If the unit does not receive the Follow Me signal during any 7 minute interval, the Follow Me mode will be cancelled automatically.

Intelligent Eye Detector
With the built-in infrared sensor, the unit can detect existence of humans in the room. If the unit keeps detecting no human activity for 30 min, it will automatically enters standby (monitor) status in order to save electricity. And the unit will automatically start and resume operation if sensing human activity again.

Names of parts

Indoor unit
1. Front panel
2. Air inlet
3. Air filter
4. Air outlet
5. Horizontal air flow grille (outside)
6. Horizontal air flow grille (inside)
7. Vertical air flow louver
8. Display panel
9. Manual control button and receiver
10. Intelligent eye detector (on some models)

Outdoor unit
11. Connecting pipe
12. Connecting cable
13. Stop valve

Indication lamp
- TEMPERATURE indication lamp
  Displays the temperature settings when the air conditioner is operational.
  Displays the malfunction code.
  Displays the actual room temperature on Fan only mode.
- INTELLIGENT EYE indication lamp (Optional)
  Lights up during Intelligent eye operation except when the machine is defrosting.
  This indication lamp continues flashing when the unit detects human activity.
- TIMER indication lamp
  Lights up during Timer operation.
- ION indication lamp (optional)
  Lights up when Clean Air feature is activated.
- DEFROST indication lamp
  (Enabled on cooling & heating models only): Lights up when the air conditioner starts defrosting automatically or when the warm air control feature is activated in heating operation.

NOTE:
All the pictures in this manual are for explanation purposes only. The actual shape of the indoor unit you purchased may be slight different on front panel and display window. The actual shape shall prevail.
OPERATING INSTRUCTIONS

NOTE: This manual does not include Remote Controller Operations, see the "Remote Controller Instruction" packed with the unit for details.

Operating temperature

<table>
<thead>
<tr>
<th>Mode</th>
<th>Room temperature</th>
<th>Outdoor temperature</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>17°C<del>32°C (62°F</del>90°F)</td>
<td>0°C<del>50°C (32°F</del>122°F)</td>
</tr>
<tr>
<td></td>
<td></td>
<td>(-15°C<del>50°C / 5°F</del>122°F: For the models with low temperature cooling system)</td>
</tr>
</tbody>
</table>

NOTE:
1. Optimum performance will be achieved within these operating temperatures. If the air conditioner is used outside of the above conditions, certain safety protection features might come into operation and cause the unit to function abnormally.
2. If the air conditioner runs for a long time in cooling mode and the humidity is high (over 80%), condensed water may drip out of the unit. Please set the vertical air flow louver to its maximum angle (vertically to the floor), and set HIGH fan mode.

Suggestion: For the unit adopts an Electric Heater, when the outside ambient temperature is below 0°C (32°F), we strongly recommend you to keep the machine plugged in order to guarantee it running smoothly.

Manual operation
Units are equipped with a switch to run emergency operation mode. This switch is used for manual operation in case the remote controller fails to work or maintenance necessary.

NOTE: The unit must be turned off before operating the manual switch. If the unit is operational, continue pressing the manual switch until the unit is off.

1. The manual switch is on the bottom of the unit as shown in the picture.
2. One press of the manual switch will lead to the forced AUTO operation. If press the button twice within five seconds, the unit will operate under forced COOL operation.

CAUTION:
- This switch is used for testing purposes only. You had better not choose it.
- To restore the remote controller operation, use the remote controller directly.

Airflow direction control
- Adjust the air flow direction properly otherwise it might cause discomfort or cause uneven room temperatures.
- Adjust the horizontal louver using the remote controller.
- Adjust the vertical louver manually or using the remote controller (depending on models).

To set the vertical air flow (Up--Down) direction
Perform this function while the unit is in operation. Use the remote controller to adjust the air flow direction. The horizontal louver can be moved at a range of 6° for each press, or swing up and down automatically. Please refer to the "REMOTE CONTROLLER OPERATION MANUAL" for details.

To set the horizontal air flow direction (left - right)
Move the deflector rod manually to adjust the air flow in the direction you prefer.

IMPORTANT: Do not put your fingers into the panel of blower and suction side. The high-speed fan inside may cause danger.

For some models, the vertical louver can be adjusted by using the remote controller. Please refer to the "REMOTE CONTROLLER OPERATION MANUAL" for details.

CAUTION:
- Do not operate the air conditioner for long periods with the air flow direction set downward in cooling or dehumidifying mode. Otherwise, condensation may occur on the surface of the horizontal louver causing moisture to drop on to the floor or on furnishings.
- When the air conditioner is started immediately after it was stopped, the horizontal louver might not move for approximately 10 seconds.
- Open angle of the horizontal louver should not be set too small, as COOLING or HEATING performance may be impaired due to too restricted air flow area.
- Do not move the horizontal louver manually, otherwise the horizontal louver will be out of sync. Please cease operating, unplug power for a few seconds, then restart the air conditioner.
- Do not operate unit with horizontal louver in closed position.
**CARE AND MAINTENANCE**

**Filter Handle**

**Cleaning the unit**
- Wipe the unit with a soft dry cloth only. If the unit is very dirty, wipe it with a cloth soaked in warm water.

**Cleaning the air filter and air freshening filter**
- A clogged air filter reduces the cooling efficiency of this unit. Please clean the filter once every 2 weeks.
- The air conditioner will control room temperature automatically to the temperature point you set.
- If you feel uncomfortable in the AUTO mode, you can set your desired temperature.

**How the air conditioner works**

<table>
<thead>
<tr>
<th>SLEEP operation</th>
<th>7 hours timer off</th>
</tr>
</thead>
<tbody>
<tr>
<td>Set Temperature</td>
<td>1°C/2°F</td>
</tr>
<tr>
<td>1 hour</td>
<td>1 hour</td>
</tr>
</tbody>
</table>

**Cooling**

<table>
<thead>
<tr>
<th>SLEEP operation</th>

</tr>
</thead>
<tbody>
<tr>
<td>Set Temperature</td>
<td>1°C/2°F</td>
</tr>
<tr>
<td>1 hour</td>
<td>1 hour</td>
</tr>
</tbody>
</table>

**Heating**

**Optimal operation**
- To achieve optimal performance, please note the following:
  - Adjust the air flow direction correctly so that it is not forwards people.
  - Adjust the temperature to achieve the highest comfort level. Do not adjust the unit to excessive temperature levels.
  - Close doors and windows on COOL or HEAT modes, or performance may be reduced.
  - Use TIMER ON button on the remote controller to select a time you want to start your air conditioner.
  - Do not put any object near air inlet or air outlet, as the efficiency of the air conditioner may be reduced and the air conditioner may stop running.
  - Clean the air filter periodically, otherwise cooling or heating performance may be reduced. Do not operate unit with horizontal louvre in closed position.

**DRYING operation**
- The fan speed will be automatically controlled under dry operation.
- During the dry operation, if the room temperature is lower than 10°C(50°F), the compressor stops operation and restarts until the room temperature is above 12°C(54°F).

**SLEEP operation**
- When you push SLEEP button on remote controller during cooling, heating(cooling & heating models only), or AUTO operation, the air conditioner will automatically increase (cooling) or decrease (heating) 1°C/2°F per hour for the first 2 hours, then hold steadily for the next 5 hours, after that it will switch off. This mode saves you energy and brings you comfort at night.

**Before mainatenance**
- Turn the system off before cleaning. To clean, wipe with a soft, dry cloth. Do not use bleach or abrasives.

**NOTE:** Power supply must be disconnectd before cleaning the indoor unit.

**CAUTIONS**
- A cloth dampened with cold water may be used on the indoor unit if it is very dirty. Then wipe it with a dry cloth.
- Do not use a chemically treated cloth or duster to clean the unit.
- Do not use benzine, thinner, polishing powder, or similar solvents for cleaning. These may cause the plastic surface to crack or deform.
- Never use water hotter than 40°C/104°F to clean the front panel, it could cause deformation of discoloration.

**Cleaning the air filter and air freshening filter**
- A clogged air filter reduces the cooling efficiency of this unit. Please clean the filter once every 2 weeks.
  1. Lift the indoor unit panel up to an angle until it stops with a clicking sound.
  2. Take hold of the handle of the air filter and lift it up slightly to take it out from the filter holder, then pull it downwards.
  3. Remove the AIR FILTER from the indoor unit. Clean the AIR FILTER once two weeks.
  4. Clean the AIR FILTER with a vacuum cleaner or water, then dry it up in cool place.
CARE AND MAINTENANCE

4. Remove the Air Freshening Filter from its supporting frame (on some models).
   - Clean the air freshening filter at least once a month, and replace it every 4-5 months.
   - Clean it with vacuum cleaner, then dry it in cool place.
5. Install the air freshening filter back into position.
6. Insert the upper portion of air filter back into the unit, taking care that the left and right edges line up correctly and place filter into position.

Replacement of air filter and air freshening filter
1. Remove the air filter.
2. Remove the air freshening filter.
3. Install a new air freshening filter.
4. Reinstall the air filter and securely close the front panel.

Preparation for extended non-operation
If you plan to idle the unit for a long time, perform the following:
1. Clean the indoor unit and filters.
2. Operate the fan for about half a day to dry the inside of the unit.
3. Stop the air conditioner and disconnect power.
4. Remove the batteries from the remote controller.

The outdoor unit requires periodic maintenance and cleaning. Do not attempt to do this yourself. Contact your dealer or service provider.

Pre-season inspection
- Check that the wiring is not broken off or disconnected.
- Clean the indoor unit and filters.
- Check that the air filter is installed.
- Check if the air outlet or inlet is blocked after the air conditioner has not been used for a long time.

Caution
- Do not touch the metal parts of the unit when removing the filter. Injuries can occur when handling sharp metal edges.
- Do not use water to clean inside the air conditioner. Exposure to water can destroy the insulation, leading to possible electric shock.
- When cleaning the unit, first make sure that the power and circuit breaker are turned off.
- Do not wash air filter with hot water at more than 40°C/104°F. Shake off moisture completely and dry it in the shade. Do not expose it directly to the sun, it may shrink.

Normal function of the air conditioner

1. Protection of the air conditioner
   - Compressor protection
     - The compressor can’t restart for 3-4 minutes after it stops.
   - Anti-cold air (Cooling and heating models only)
     - The unit is designed not to blow cold air on HEAT mode, when the indoor heat exchanger is in one of the following three situations and the set temperature has not been reached.
       A) When heating has just started.
       B) Defrosting.
       C) Low temperature heating.
   - Defrosting (Cooling and heating models only)
     - Frost may be generated on the outdoor unit during heat cycle when outdoor temperature is low and humidity is high resulting in lower heating efficiency of the air conditioner.
     - During this condition air conditioner will stop heating operation and start defrosting automatically.
     - The time to defrost may vary from 4 to 10 minutes according to the outdoor temperature and the amount of frost built up on the outdoor unit.

2. A white mist coming out from the indoor unit
   - A white mist may generate due to a large temperature difference between air inlet and air outlet on COOL mode in an indoor environment that has a high relative humidity.
   - A white mist may generate due to moisture generated from defrosting process when the air conditioner restarts in HEAT mode operation after defrosting.

3. Low noise of the air conditioner
   - You may hear a low hissing sound when the compressor is running or has just stopped running. It is the sound of the refrigerant flowing or coming to a stop.
   - You can also hear a low "squeak" sound when the compressor is running or has just stopped running. This is caused by heat expansion and cold contraction of the plastic parts in the unit when the temperature is changing.
   - A noise may be heard due to louver restoring to its original position when power is turned on.

4. Dust is blown out from the indoor unit.
   This is a normal condition when the air conditioner has not been used for a long time or during first use of the unit.

5. A peculiar smell comes out from the indoor unit.
   This is caused by the indoor unit giving off smells permeated from building material, from furniture, or smoke.

6. The air conditioner turns to FAN only mode from COOL or HEAT (For cooling and heating models only) mode.
   When indoor temperature reaches the temperature setting on air conditioner, the compressor will stop automatically, and the air conditioner turns to FAN only mode. The compressor will start again when the indoor temperature rises on COOL mode or falls on HEAT mode (For cooling and heating models only) to the set point.
**TROUBLESHOOTING TIPS**

1. **The air conditioner runs Anti-mildew function after turning off the unit.**
   When turning off the unit under COOL/AUTO COOL, FORCED COOL and DRY mode, the air conditioner will run Anti-mildew function for 7-10 minutes. If turned off on HEAT mode, the unit will continue operating for about 30 seconds at LOW fan speed, then stop the operation and turn off the unit automatically.

2. **Dripping water may generate on the surface of the indoor unit when cooling in a high relatively humidity (relative humidity higher than 80%). Adjust the horizontal louver to the maximum air outlet position and select High fan speed.**

3. **Heating mode (For cooling and heating models only)**
   The air conditioner draws in heat from the outdoor unit and releases it via the indoor unit during heating operation. When the outdoor temperature falls, heat drawn in by the air conditioner decreases accordingly. At the same time, heat loading of the air conditioner increases due to larger difference between indoor and outdoor temperature. If a comfortable temperature can't be achieved by the air conditioner, we suggest you use a supplementary heating device.

4. **Auto-restart function**
   - Power failure during operation will stop the unit completely.
   - For the unit without Auto-restart feature, when the power restores, the OPERATION indicator on the indoor unit starts flashing. To restart the operation, press the ON/OFF button on the remote controller. For the unit with Auto-restart feature, when the power restores, the unit will automatically return to the previous settings.

5. **When you are switching on or turning off the unit, and suddenly there is a power cut, the front panel or louver is not yet opened or closed, do not attempt to press hard with force to make them fully closed. When the power restores, the front panel or louver will open or close automatically.**

6. **Anti-mildew**
   - Operates if the unit stops on HEAT mode, the unit will continue operating for about 30 seconds at LOW fan speed.

7. **Troubleshooting guide**

8. **If the trouble has not been corrected, please contact a local dealer or the nearest customer service center. Be sure to inform them of the detailed malfunctions and unit model number.**

9. **Notes:**
   - Do not attempt to repair the unit yourself.
   - Always consult an authorized service provider.
