1. Safety precautions

In order to avoid possible damage to you, others or any property, please make sure to pay attention to the following safety precautions.

If the machine power cord is broken or unit is out of order, you must contact the manufacturer, maintenance service center or qualified technician to replace unit to assure safety.

⚠️ WARNING

🚫 Do not touch power plug with wet hands.
Wet hands can cause electric shock. Never touch with wet hands.

🚫 Prohibited use beyond power. Can only use a 220v unit with a 220v power supply. Can only use a 110v unit with a 110v power supply. You can break and ruin the circuit boards if you plug into a 220v power supply. Make sure you are using proper machine with proper power.

🚫 Please insert the plug completely into the power socket before starting the air purifier. If not, it may cause electric shock and overheating, even fire accident.
Do not use damaged plug or loose power socket.

🚫 No damage to power line and socket.
Do not bind wires when you use this machine. It may cause electric shock, short circuit and fire accident if you use broken wires. Any cutting and scratching,refixing, overdistorting, twisting, screwing and pulling of lines are all forbidden. Do not put any heavy product on wires and sockets.

🚫 Regularly clean power plug
Do not allow dust to accumulate on power plug. This can cause damage to insulation in plug and cause a fire accident.
- Pull out the power plug and then clean with dry cloth (do not use wet cloth).
- If machine is not planned to be used for any extended period of time, unplug it for safety reasons

🚫 Do not take apart or modify the air purifier without authorization.
Taking apart or modifying air purifier is forbidden. Without authorization may cause electric shock, malfunction or fire accident.

🚫 Do not put bars or metal products nearby air outlet or openings.
If metal bars touch inside of machine it can cause electric shock.
Notice

Please turn off the power immediately in case of any of the following situations:
- Malfunction of any switch;
- Circuit breaker fails
- Abnormal heating of wires or plugs
- Any burnt smell, anomol sound or shock
- Any other malfunction or malfunction

![Warning]

Do not use solvent like benzene, diluent, etc. to clean air purifier. Keep the machine away from wasp spray.
This can cause Air purifier to break, be damaged or short circuit, which can lead to electric shock or fire accident.

![Warning]

Do not use air purifier in a greasy area.
For example, in kitchens with a significant amount of grease particles, as it will reduce the life of the machine.
- This machine should not be used as ventilating or air evacuating equipment.

![Warning]

Do not use the air purifier in the room with fumigation type pesticides.
Chemical residue could be accumulated inside the machine and then released, causing harm to health.
- The room should keep ventilated thoroughly after you use insecticide and then start to use air purifier.

![Warning]

Keep machine body dry.
Or else it may cause electric shock or fire accident because of short circuit.

![Warning]

Keep away from flame!
Keep the machine away from volatile substances or flammable items such as tobacco and sparks;
Or else it may cause fire accident.

USER MANUAL

Disassembly and installation methods of the back cover

1 Disassembly method of the back cover
Press tabs on the back cover and pull on the cover, then you can lift the back cover and pull out slightly.

2 Installation method of the back cover
To reinstall the back cover, please align at the fixed groove and insert the cover into the groove. Making top button snap and frame with hold.

Placement of air purifier

To make sure you get good air circulation, please ensure there is a 20 inch or 50 cm distance between air inlet and wall or curtain.

Please keep 3 feet from TV. It is not recommended to plug into same outlet as TV to prevent any interference.

Do not obstruct air inlet and outlet, ensuring enough ventilation and high efficiency.
Install filter set

Information
All the filters are equipped with the purifier together, you should remove all the packings of the filter before use. Please disassemble filters according to the following instructions, reinstall the filter to air purifier.

Attention
When doing maintenance or transporting, please remove all packaging on the filters before use.
Do not use the machine without filter.

Hint
Place unit against to the wall when changing filters for added stability.

Operation steps
Operate in accordance with the following steps to ensure correct filter installation when you first use this machine.

1. Place the machine in a dry, smooth and flat ground.

2. Press top button in the back cover and pull the cover, then you can lift the back cover and pull out slightly.

3. Disassemble all the filters.
4. Remove all package of the filter sets.

5. Place filters back into air purifier after packaging is removed.

6. To reinstall the back cover, please align at the fixed groove and insert the cover into the groove, making the top button and frame withhold.

**Hint**

Please be careful when installing the back cover, watch your hands.
4 step filter purification

First step: Fibre filter
Second step: High efficiency HEPA filter
Third step: Activated carbon filter
Fourth step: Anion generator

First step: Pre-filter
Intercepting hair, fiber, large particles, dander, etc.

Second step: High efficiency HEPA filter
Hepa H13 filter is medical grade and can remove 99.97% of particles down to 0.03 microns as well as PM2.5, smoke, pollen, mites and other particles.

Third step: Activated carbon filter
Can absorb volatile organic compounds and further remove toxic substances such as formaldehyde and other peculiar smell.

Fourth step: Anion generator
Anion generator can produce negative ions, make the dust, bacteria, spores, pollen, dander and other particles charged, then it will be absorbed by integrated discharge device, it can remove PM2.5. And anion can also activate oxygen molecules in the air to form negative oxygen ion.
5 How to use

Function description of control panel

Plug in

After plugging in, the air purifier will beep. All the indicator lights will flash 3 times. Then the power light will flash slowly.

Turn on the air purifier

Press on/off button. The Air Purifier will start in Auto mode. The indicator light of AUTO mode and power light will be on.

The air quality sensor will detect the air quality automatically after 2 minutes as machine needs time to calibrate to calculate air quality properly.

Hint

Please press ON/OFF button again to turn off the machine. With a beeping sound the power light will flash, then pull out the power plug.
**Manual adjustment of fan speed**

Press SPEED button, you can choose air speed in turn 'AUTO mode, speed 1, speed 2 and speed 3'.

Under AUTO mode, the purifier will choose fan speed automatically according to the air quality.

**TIMER mode**

Press timer button and choose hour options 1, 2, 4, 8 or no timer

**ANION mode**

Under AUTO mode, if the lighting in the room is dark the air purifier will enter SLEEP mode. Then all the indicator lights will be off except the power light. The fan speed change to low speed.

**Press ANION button, with beeps, anion function will work, and the indicator light of ANION will be on.**

Press ANION button again and the air purifier will go out of Anion mode. The indicator light for Anion will then be off.

**Child-lock function**

In this mode, none of the function keys can be used or changed. (Except the child lock function. To turn on the child lock hold the button down for 3 to 5 seconds. To turn off the child lock function hold the button down for 30 to 45 seconds. THIS FEELS LIKE A LONG TIME, BUT IS DONE PURPOSELY SO PEOPLE CAN NOT UNLOCK IT UNLESS YOU WANT IT UNLOCKED.

**Photosensitive sensor**
6 Maintenance and cleaning method

Please make sure to pull out power plug before cleaning the machine. Do not immerse machine in water or any other liquid. Do not use any detergent with abrasiveness, corrosive or inflammability (such as bleach or alcohol) to clean any parts of the product. The purifier uses composite filters, the filters cannot be washed.

1. Use soft brush to clean inlet and outlet of air quality sensor.

2. Disassemble the cover of air quality sensor.

Clean the air purifier

Clean the air purifier regularly to prevent dust accumulation.
1. Use soft and dry clothes to remove the dust from the air purifier.
2. Use soft and dry clothes to clean the outlet and inlet of the air purifier.

Clean the air quality sensor

Clean air quality sensor every two-month to ensure best running performance. Please clean often if machine works in a dusty environment.

Attention

The air quality sensor may accumulate condensation. If this happens the air quality sensor even in a good air room may show poor air quality. Please make sure air quality sensor is clean and dry to perform properly.

3. Use dry swab to clean the air quality sensor, air inlet and outlet.

4. Reinstall the cover of air quality sensor.
Change filter

Information

The machine will remind user when filter needs to be replaced.

Operating steps

1. The machine will remind user to replace filters after 3000 hours of use. When indicator light is on, it is time to change your filters with genuine Medify replacement filters.

2. Turn off the power, then pull out the power plug.

3. Press top button in the back cover and pull the cover, then you can lift the back cover and pull out slightly.

Attention
Please turn off and pull out power plug before replacing the filters.

Hint
Please remove the package of each filter before putting them into the machine and please make the label of filter face upward.
4. Remove all packaging materials on filter sets

5. Remove all packages of filters, then install the new filters into the air purifier in order.

6. Making the top button snap into place.

7. When the filter replacement is completed, plug in and turn on the air purifier, press the SPEED button and ANION button for 3s to reset the machine.
USER MANUAL

Long-time idling

Do not leave Unit plugged in for long times when not in Use.

Place machine in a dry and well-ventilated place.

Suggested frequency of replacing the filter set

In general, the life span of HEPA filter is 6 months. You could use brush or dust collector to remove dust on surface of the filter, do not press hard. The Air Purifier uses composite filters. These filters can NOT be washed.

⚠️ Attention

Please turn off and pull out power plug before replacing the filters.
6 Common Questions and how to fix.

The following table lists failure possible to appear in dairy use. Please contact company service center or dealer if you cannot find answer from the listed examples.
